

NITHIN RAJU

FULL STACK DEVELOPER

nithinraju242@gmail.com | +91 8075676605 | Portfolio | LinkedIn | GitHub

Profile Summary

Full Stack Developer with hands-on experience building production-grade web platforms across media streaming, admin tooling, marketplaces, and notification systems using React, Next.js, TypeScript, and Node.js. Skilled in end-to-end ownership from UI design through API integration, feature-flagged rollouts, and cross-org scalability with a strong focus on clean architecture and measurable product impact.

Skills

Frontend: HTML, CSS, JavaScript, TypeScript, React JS, React Native, Next.js, Tailwind CSS, Bootstrap, Material Tailwind, Redux-Toolkit, Zustand, TanStack Query.

Backend: Node.js, Express.js, REST API, oRPC, JWT, MVC Architecture, EJS.

Database: MongoDB, Mongoose, SQL, PostgreSQL, Redis, DynamoDB, S3 Bucket, Cloudinary.

DevOps & Cloud: AWS (EC2, S3, SNS, SES), Nginx, Docker.

Testing: React Testing Library, Vitest, Jest.

Methodologies: Agile, Scrum, Sprint Planning, Jira (Kanban/Sprint boards).

Tools & Platforms: Linux, Git, GitHub, Bitbucket, Firebase, Razorpay, Socket.IO, Postman, Figma, LaunchDarkly, Mux, Pendo, Storybook, dnd-kit, GSAP, Tiptap, DatoCMS.

AI Tools: GitHub Copilot, ChatGPT/Claude (dev workflows).

Professional Experience

Front-end Developer, Tech Mission Solutions (Amazing Life)

01/03/2025 – 30/09/2026

Amazing Kids Admin – Digital Signage & Media Management Platform

- Owned a custom web media player (fullscreen playback, closed captions, dual-buffer seamless track switching, auto-advancing slideshows) end-to-end, with Pendo-driven analytics instrumentation to track playback and engagement.
- Built device fleet management and drag-and-drop playlist/queue scheduling (dnd-kit), giving admins centralized control over 3000+ devices across 1000+ organizations and cutting content-scheduling time by 50%, drove feature-flagged (LaunchDarkly) rollout strategy for high-risk releases.
- Delivered the "Connect" module from scratch — subscription rails, publish/unpublish workflows, org sub-domains — from UI design through backend API integration, adding a new product surface.
- Established a Storybook-based Atomic Design system (reusable atoms/molecules for buttons, inputs, navigation), adopted team-wide and improving UI consistency across the platform.

Service Builder Web – Church Service Planning Platform

- Built a PDF export pipeline (branded themes, section-based exports) using `@react-pdf/renderer`, used by 1000+ organizations for print-ready service run-sheets.
- Implemented secure cross-org service sharing via scoped read-only links and shipped a "Church Partners" storefront (browse/follow/unfollow, grid discovery), extending collaboration to external partner churches.
- Built lineup and routine management (create/edit/link/unlink) with rich-text editing (Tiptap) and full state management, streamlining the core service-building workflow for 1000+ organizations, instrumented with Pendo for usage analytics and adoption tracking, and covered with Vitest/React Testing Library unit tests for reliability.
- Redesigned the service duplication/copy workflow, reducing the time to create a new service from an existing template.

Parent Plus Admin – Notifications Platform

- Delivered a notification platform end-to-end (create/edit/send-now/scheduled sending with time-zone-aware delivery) for 60+ white-labeled Android/iOS apps.
- Built paginated, sortable/filterable user and notification listings with status tracking (sent/scheduled), giving admins visibility across delivery history at scale.
- Led migration of the application's API layer to oRPC, improving type-safety across the frontend/backend boundary and reducing integration bugs.

TMS Website – Marketing & Careers Site

- Built CMS-driven marketing/careers site sections (job listings, team/culture pages, testimonials) integrated with DatoCMS, supporting the company's hiring pipeline.
- Implemented GSAP-based scroll/entry animations and Zustand state management for dynamic job-opening navigation via URL, delivering a polished marketing experience.

Also contributed to 2 additional Next.js products: an auth/trial onboarding portal (Firebase) and a standalone media player app with analytics instrumentation.

Technologies: React.js, Next.js, TypeScript, TanStack Query, oRPC, MUI, Tailwind, Zustand, LaunchDarkly, Mux, Storybook, React Testing Library, Vitest, Jest, dnd-kit, Firebase, GSAP.

MERN Stack Developer, Dhruv 360

01/07/2024 – 28/02/2025

Service Connect – On-Demand Service Marketplace

- Built a full-stack, franchise-based marketplace connecting users with local service providers, enabling seamless discovery, booking, and secure payments.
- Designed multi-role architecture (clients, providers, franchise owners, admins) supporting subscriptions, lead generation, and dispute resolution — driving recurring provider revenue.
- Implemented admin analytics dashboard for real-time monitoring of platform activity, disputes, and financial performance across franchises.

YourMJ – Interview Success Coaching Platform

- Developed an interview-coaching platform delivering interactive training modules, increasing user engagement through structured skill-building content.
- Streamlined onboarding with OTP-based auth (AWS SNS) and automated email reminders (AWS SES), and enabled monetization via Razorpay-integrated course enrollment — reducing drop-off and improving retention.

BuddyPair – Dating Platform

- Built a full-stack dating platform (web + mobile) with real-time chat, video calls, and location-based matchmaking to drive user engagement.
- Engineered a smart matching algorithm with advanced filtering to improve match quality, alongside admin moderation tools, data encryption, and compliance controls (account deletion, data requests) for trust and safety at scale and also managed subscription billing and revenue tracking via Razorpay integration.

Technologies used across projects: React.js, React Native, Next.js, Redux, Node.js, Express.js, Tailwind CSS, Material Tailwind, MongoDB, Mongoose, AWS DynamoDB, JWT, bcrypt, Razorpay, AWS SNS, AWS SES, AWS EC2, S3-bucket, Nginx.

Education

Pune University, BBA in Marketing

2018 – 2021

- CGPA: 7.8

Community Involvement

Community Member, Glulink

2024 – Present

Actively contributing to open-source projects by collaborating with developers, engaging in discussions, and assisting in project improvements. Participating in community events, code reviews, and knowledge-sharing sessions.

Languages

Malayalam (Native), English (Fluent), Hindi (Proficient)

Declaration

I hereby declare that all the information provided in this document is true and accurate to the best of my knowledge.
